Portfolio: <https://skegdeveloper.online/> | GitHub: github.com/SKEGDEV | LinkedIn: linkedin.com/in/eduardo-gonzalez-910793212

PROFESSIONAL SUMMARY

Full-Stack Developer experienced in legacy modernization, AWS architecture and modern front-end development. Strong background in monolith-to-microservices migrations, automation and scalable solution design with a Spec-Driven Development mindset.

PROFESSIONAL EXPERIENCE

Macoris S.A Guatemala

Full-Stack / Cloud Developer | July 2025 – Present

- Led legacy modernization from .NET 4 to .NET 10 to improve scalability and business continuity. Architected and deployed AWS solutions using ECS, EC2, Load Balancers and custom domains. Built a customs control platform with React TS, Vite and asynchronous AWS SQS-driven workflows. Implemented CDC, JWT, Bash automation and SDD practices for the V2.0 architecture.

ITProfis S.A Guatemala

Software Developer | April 2022 – July 2025

- Migrated legacy WCF .NET and ASPX systems to modern .NET 6 and React JS solutions. Modernized direct deposit automation with AWS Lambda .NET, reducing infrastructure overhead. Designed and documented the C4 architecture for a centralized utility payment platform.
- Revived a legacy kiosk system, delivered QR reporting and improved performance through telemetry.

TECHNICAL SKILLS

- **Backend & Architecture:** .NET, .NET 6/10, Microservices, JWT, CDC, C4.
- **Frontend:** React TS, Vite, React JS, React Native, Angular.
- **Cloud & DevOps:** AWS (EC2, ECS, Lambda, SQS, Load Balancers), Bash, GitHub Actions.
- **Databases:** SQL, PostgreSQL.

SOFT SKILLS

- Resilience, systems thinking and methodical problem-solving. Autonomy, self-learning and fast technology adoption.
- Clear technical communication in high-demand environments.

LANGUAGES

- Spanish: Native
- English: Intermediate technical and conversational
